Hi Robert,

There is an error on our website. EPA has primacy over all UIC Class VI wells (meaning there are no states that have primacy over UIC Class VI wells). We are working to fix the language on the website – thanks!

Sonia Brubaker
Acting Deputy Director of Communications
Office of Water

U.S. Environmental Protection Agency

All, the reporter already sent this to R8, but is this for the region or for HQ? Please advise?

Also, the reporter says she's on a 5 PM DDL.

"Hope you're both well. I have a 5 p.m. deadline for this. There is language on EPA's website that says EPA directly implements the SDWA UIC permitting Class VI Program nationally, except for the State of North Dakota. I know that North Dakota applied for primacy in 2013, but as of right now I did not think that had yet been approved.

Can you explain? Who would have primacy to issue class VI permits right now if someone were to apply for a permit in North Dakota?

<http://water.epa.gov/type/groundwater/uic/primacy.cfm>

Many thanks,"
